

GIRA

Anticipation
means
knowing
what's
coming.

Gira / Door intercom systems

We are Gira.
We are the ones with the switches.
But we're so much more.

Future-oriented.
Certified.
Responsible.

We're the guardians, innovators,
smart home pioneers, developers,
systems thinkers, KNX partners,
shapers of the future, patent masters,
award winners and designers.

But above all, we're the ones
who listen.
To you.

Subtle, but smart.
With distinct focus on quality,
materials and functions.
And the driving force of innovation.

In our hearts, we are engineers
on a mission to inspire.
With new technologies,
smart applications, and
impressive attention to detail.

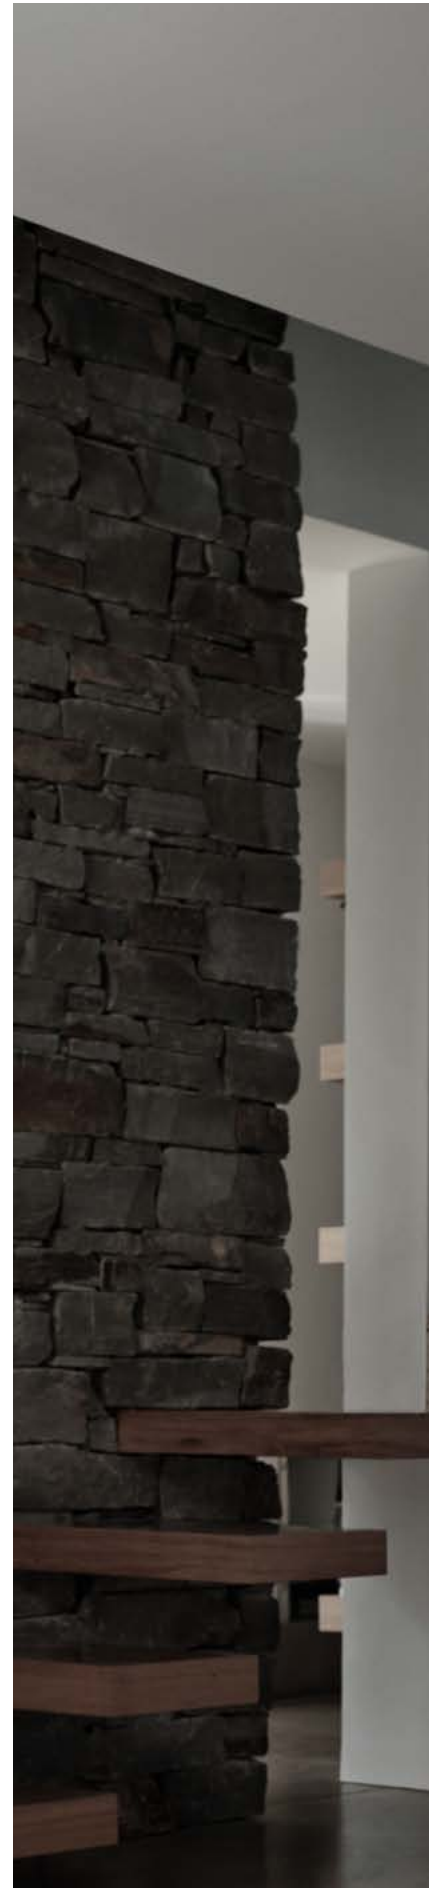

We will always work our hardest
to find the best solution for you.
With service, design and performance
made in Germany.

Because that is what we stand for.
And have been standing for since 1905.

Increase your security. Not your stress level.

When the bell rings, you only need a minute. A quick glance at the door intercom system from Gira and you'll be prepared for whoever is on your doorstep – from unexpected visitors to parcel couriers bearing gifts.

With numerous products to choose from – for indoors and outdoors, with or without video, for Smart Homes, single and multi-family homes – you can increase security at home and upgrade to comfort class.

And their modern design and high-quality workmanship mean that the Gira door intercom system meets the highest design standards and functional requirements.

You don't get a
second chance at
a first impression.

Why wait until guests are
inside before showing your
sense of style? Gira door
intercom systems offer reliable
technology – and a dash of
design flair.

Mix and match designs and functions.

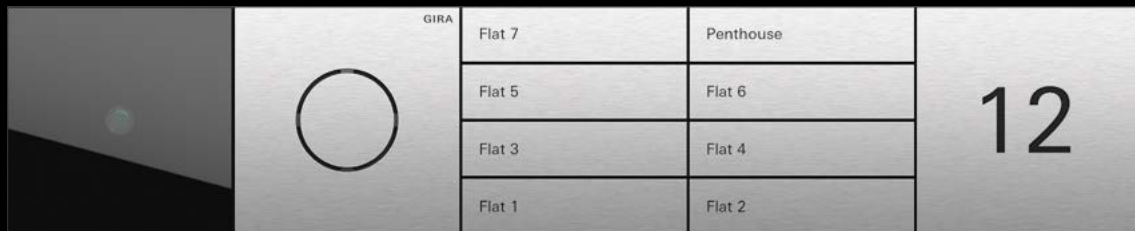

Excellent design and maximum flexibility – the modular Gira System 106 lets you build your door intercom system just the way you want it.

- 01 The door station module is a complete hands-free unit equipped with call button, microphone and speaker.
- 02 The call-button module has up to four call buttons.
- 03 Occupants and visitors communicate via the intercom module.

- 04 The powerful camera module with elegant black glass plate.
- 05 The info module shows your house number, street name or company logo.
- 06 The display module with easily understandable symbols for speaking, listening and opening the door.

High-tech. With looks to match.

⊕ Gira System 106 –
highlights, facts and benefits:

Standardised dimensions of 106.5 × 106.5 mm per module mean that all components can be combined flexibly and arranged vertically, horizontally or as a square.

Intercom system with background noise suppression.

Camera with backlight compensation.

Camera heating is switched on as required.

Compatible with all Gira home stations and door communication solutions.

For new buildings and existing buildings.

Gira inscription service for a perfect, elegant look.

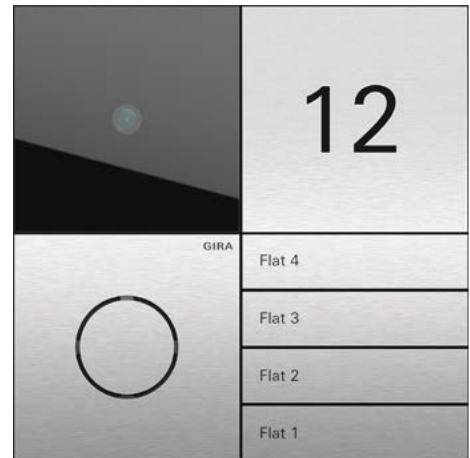

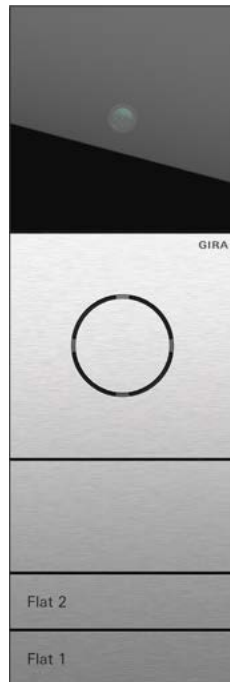

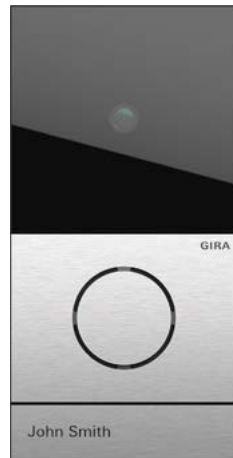

Available finishes:

Bronze (PVD),
 stainless steel,
 seawater-resistant
 stainless steel V4A,
 aluminium and
 traffic white,
 lacquered

Four different design finishes let you adapt the Gira System 106 to your personal taste and varying requirements. The black glass plate camera module also gives it a modern look.

The design finishes can be exchanged independently of the underlying technology.

The perfect couple.

Choose from a range including the Renz Plan S letterbox series for wall installation, the free-standing Renz letterbox pedestal and the myRENZbox parcel box system. A stylish and convenient way to receive parcels even when you are absent.

Gira System 106 with RENZ letterbox system – highlights, facts and benefits:

Integration in Renz letterbox systems.

All functions required at the front door, compactly in one place.

Insulated letter flap with noise damping.

Available in a variety of materials.

A strong statement.

The height of elegance and durability – the Gira door station with high-quality stainless steel front plate has a captivating, modern appearance and a particularly weather-resistant exterior.

With versions for up to twelve residential units, it is ideal for both single and multi-family homes.

⊕ Gira stainless steel door station – highlights, facts and benefits:

Front plate made of 3 mm thick V2A stainless steel.

Almost flush transition from the front plate to the name plate.

Secure, concealed design of speaker and microphone.

Optionally with colour camera with automatic backlight compensation.

Microprocessor technology with echo and background noise suppression.

Gira inscription service for a perfect, elegant look.

Timeless design. Enduring quality.

The Gira door station in the Gira TX_44 design line combines a timeless appearance with sturdy, weatherproof workmanship. The basic equipment includes a speaker, microphone and doorbell with white LED backlighting.

Further components such as a colour camera or info module can easily be added as desired.

Modules for the Gira TX_44 door station:

- 01 Call button, 1-gang
- 02 Call button, 3-gang
- 03 Colour camera
- 04 Speaker and microphone
- 05 Info module

⊕ Gira TX_44 – highlights, facts and benefits:

Subsequent extension with modular components.

Hands-free unit with voice-operated switch for high voice quality.

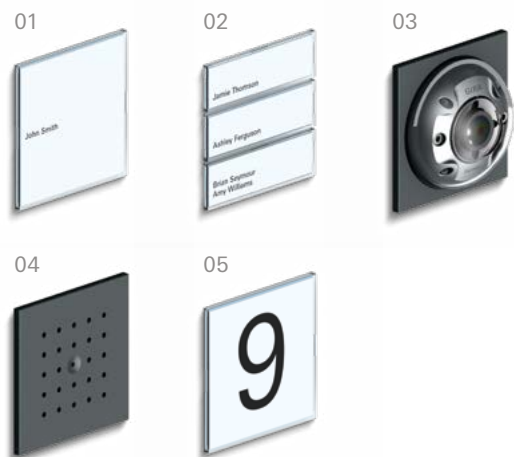

Shatter-proof, UV-resistant and splash-proof.

With 1-gang or 3-gang call button; further call buttons can be added.

Colour camera with automatic backlight compensation.

Available in surface-mounted or flush-mounted versions.

Gira inscription service for a perfect, elegant look.

Simple. Secure. And not a key in sight.

The Gira KeylessIn solutions offer two convenient and secure ways for you to open your front door: with a fingerprint, or inputting a code. The Gira KeylessIn fingerprint uses the latest high-frequency technology to reliably identify your unique fingerprint.

And the highly responsive Gira KeylessIn keypad allows access after you enter your personal combination of numbers.

Gira KeylessIn variants:

- 01 Gira KeylessIn fingerprint and Gira TX_44, anthracite
- 02 Gira KeylessIn fingerprint and Gira TX_44, colour aluminium
- 03 Gira KeylessIn keypad and Gira TX_44, pure white

Gira KeylessIn – highlights, facts and benefits:

Management of up to 99 fingerprints or 255 codes.

Can be used as separate devices or in the Gira door communication system.

Maximum protection against tampering.

LED lighting of the sensor surface.

01

02

03

Time to surround
yourself with
beautiful things.

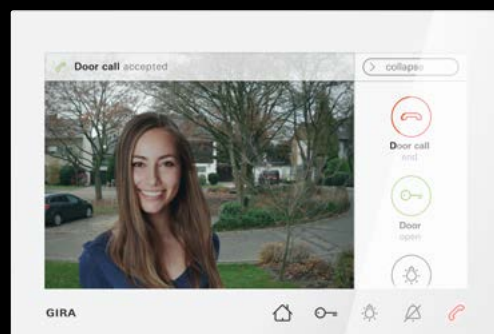

Blending designer looks with
home convenience. With a Gira
door intercom system, you can
treat yourself to a dash of style
and a warm sense of security.

A real eye-catcher.
And you've got
everything covered.

A large colour display, intuitive operating concept and wide range of functions make the Gira surface-mounted home station 7 a perfect choice.

The screen of the Gira surface-mounted home station 7 automatically switches on when the doorbell rings. And the particularly wide viewing angle lets you keep everything in sight.

Large display. Maximum convenience.

⊕ Gira surface-mounted
video home station 7 –
highlights, facts and benefits:

High-resolution colour screen.

Intuitive operating design.

Button actuation with noticeable
vibration effect and sound.

Ten pre-installed ringtone melodies.

MicroSD card provides an easy option
for saving settings and images and
playing your own ringtone melody.

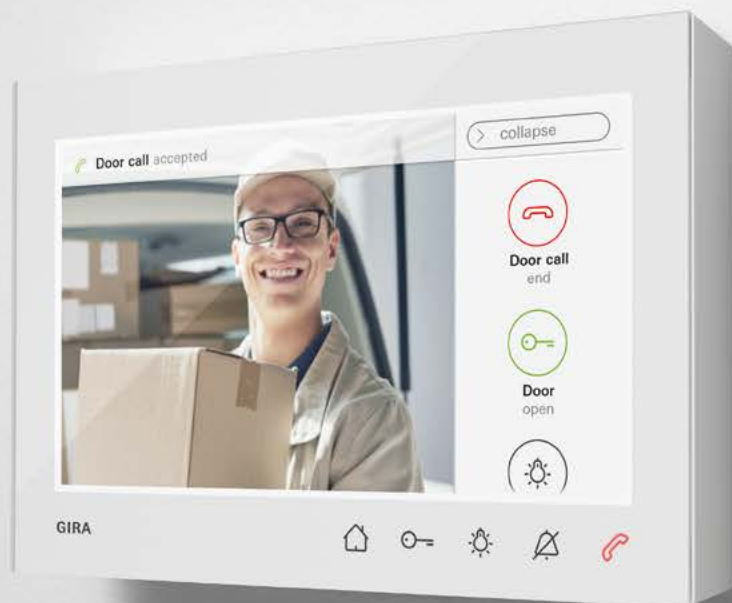

Quick, no-fuss installation via the
DCS 2-wire bus system.

Surface-mounted installation on the
wall or with base foot for positioning
on a piece of furniture.

Available in pure white and black.

Slim dimensions:
(W x H x D: 181 x 123 x 21 mm).

The home station is operated via the full-screen touch display. In addition, essential functions such as accepting a door call, switching on the light or muting the bell can be operated using the five speed buttons at the bottom of the screen.

Your home.
Your style.

The Gira surface-mounted home stations can be combined with a total of eleven design lines and over 90 cover frame variants from Gira System 55. For a design that blends perfectly with your look.

Cover frame:

- 01 Gira E2
flat installation,
pure white glossy
- 02 Gira Esprit,
black glass

Video home stations

With the Gira surface-mounted video home station Plus, you always know exactly what's happening on your doorstep. The flush integrated 5.6 cm (2.2") display can be set to automatically transmit the camera image as soon as the doorbell rings, and also serves as a status display. The home station is operated using buttons that are highly responsive thanks to capacitive sensor technology.

Audio home stations

The Gira home station with audio function offers easy door communication with excellent voice quality. And with only four buttons – for accepting calls, opening doors, switching the ring tone on and off, and regulating the volume – it's really simple to operate. If the background noise is particularly loud, the override function automatically adjusts the microphone to the highest level to optimize communication.

⊕ Gira video home station – highlights, facts and benefits:

Fast, simple installation directly on the wall.

The local image memory records up to three images each time the doorbell rings, so you can see who rang the bell while you were away.

Up to ten separate ring tones via microSD card.

Can be retrofitted with little mess or effort via each doorbell system's 2-wire bus.

⊕ Gira audio home station – highlights, facts and benefits:

Fully pre-assembled.

Five different ringtone melodies available for selection.

High voice quality, similar to mobile phones and hands-free units in cars.

Flat profile height of only 21 mm.

Building control. Smart technology for the future.

SIP Client function

In buildings with more than 62 devices or a concierge, the Gira G1 also includes a SIP Client providing a coordinated connection between the front door and Gira smart apartments.

SIP Client function

SIP-compatible door station, e.g. Comelit, Schüco or TCS

SIP

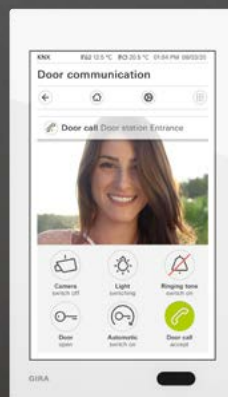

Concierge/
reception

Gira G1
SIP Client

In a Smart Home, digitally networked home technology can be operated via a central control device. Now all this can be integrated into your smart door intercom home station, so that no additional devices are required.

Gira G1

The multifunctional Gira G1 can be integrated as the central control device in a modern, Smart Home technology system (KNX) or used solely as a video home station. The display automatically shows the camera image when the doorbell rings and can be operated intuitively at the touch of a finger.

Gira G1 – highlights, facts and benefits:

Vivid 6" (6 x 11 cm) large TFT colour display.

Images, graphics and text are clearly displayed from all viewing angles.

User-friendly menu guidance with large font and easy-to-understand symbols.

Sensitive touch surface.

High-quality materials and elegant, compact design in black or white.

Show that you're there. Even when you're not.

DCS mobile App

With the Gira DCS mobile App, you can operate your door intercom system from anywhere using your smartphone. This means that you can communicate with people at the door even if you are not there, or from the comfort of your sofa or garden.

DCS IP gateway

All that you need is the Gira DCS IP gateway. It integrates your door intercom system into your home network and lets you always keep an eye on your front door – whether at home via WLAN or on the move via the mobile data network.

And to ensure that only you have access to the communication, the connection is securely encrypted.

 Gira DCS mobile and DCS IP gateway – highlights, facts and benefits:

Door intercom system can be operated remotely via the App, or on the home WLAN.

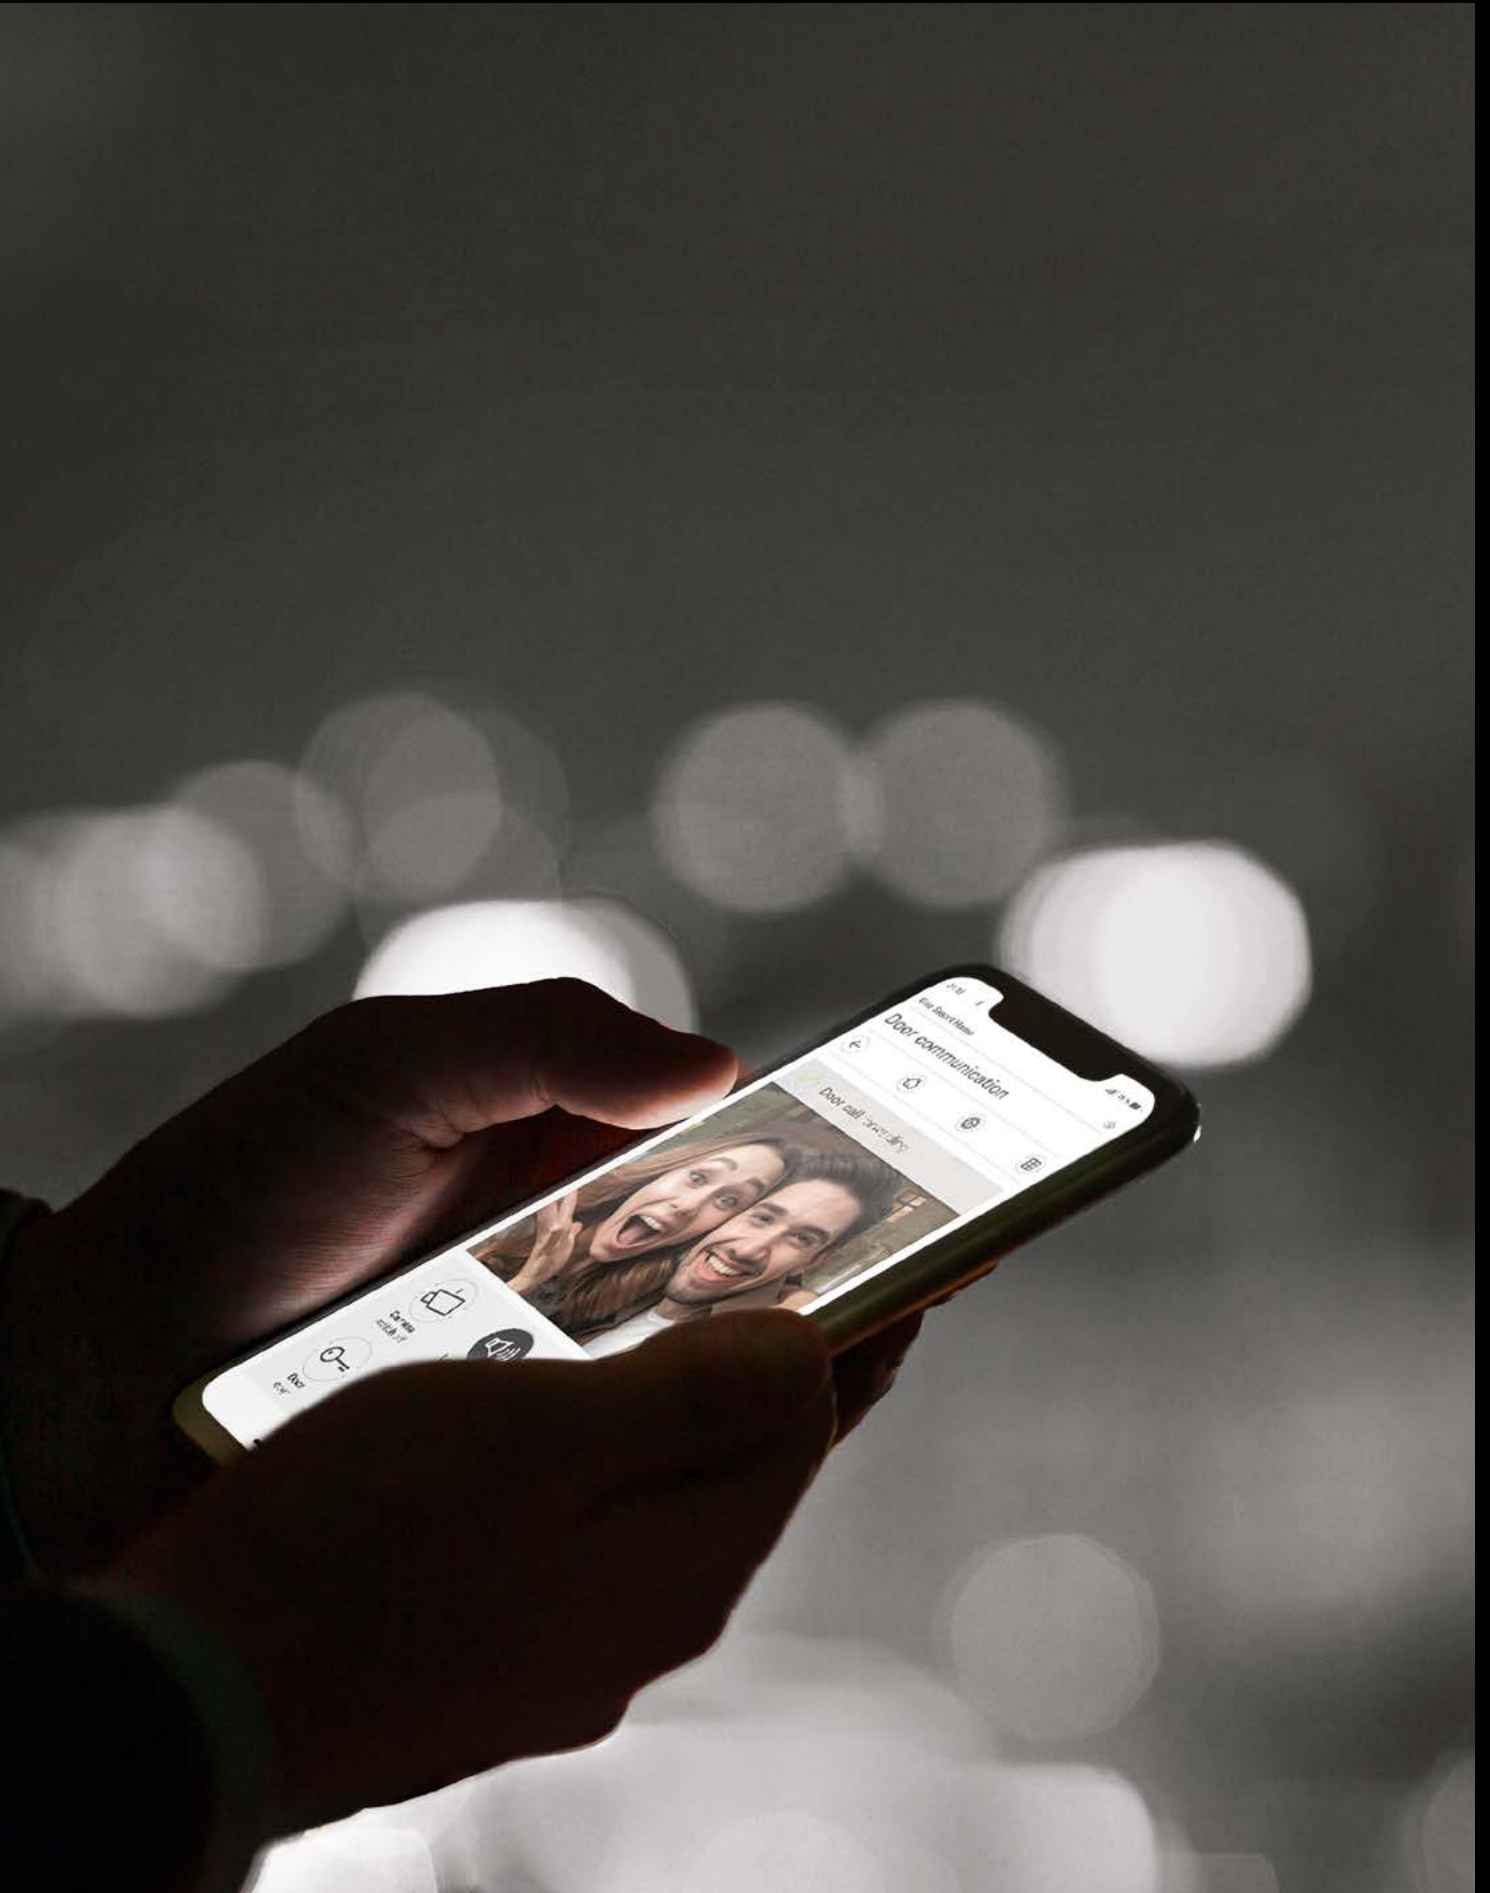

Secure data encryption of communication via Secure Data Access.

Push notification of door call even when the App is inactive/closed.

Uniform interface on all connected devices.

Gira DCS IP gateway easily installed as DRA device in the control cabinet.

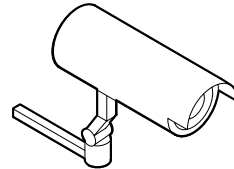

Door intercom systems / Retrofitting & Gira DCS camera

Life is full
of surprises.

With simple, practical solutions
for retrofitting, Gira supports
you in a variety of situations
and ensures that you can adapt
to every change.

Focus on what's important. You.

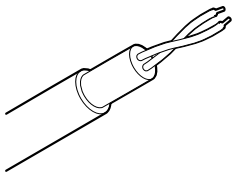

DCS camera

Retrofitting

Retrofitting a door intercom system doesn't necessarily mean making a mess. Thanks to 2-wire bus technology almost any existing doorbell system can be upgraded with Gira. A modern door intercom system can even be installed quickly and easily in old buildings, without having to cut open the wall.

The same applies to your doorstep. With the compact Gira built-in speaker, the door communication system can be easily integrated into existing letterbox systems, door-side installations or front plates and connected with up to eight call buttons.

The Gira DCS camera gateway can be used to integrate external analogue cameras into an existing Gira door communication system without much effort via the 2-wire bus and video control device. You will then have an overview of all areas of your house on your home station.

Good to know

You will generally have everything you need for a modern door intercom: simple installation with 2-wire bus technology.

Dreams are good. Plans are better.

The Gira door communication configurator makes it quick and easy for you to find the right module and system components for your future door intercom system. The user-friendly online tool asks you for your requirements and gives you competent answers.

dcconfigurator.gira.com

Perfection with your name on it.

The Gira inscription service ensures that your Gira Door Communication System has neat, uniform inscriptions. Depending on the product, you can choose between various fonts and font sizes.

It's very easy to order printed inscription labels online that are ideally adapted to your products and easy to insert.

With full metal inscription labels you have the option of having your inscription applied directly to the material using laser technology and having the finished inscription labels delivered by your Gira electrical installer.

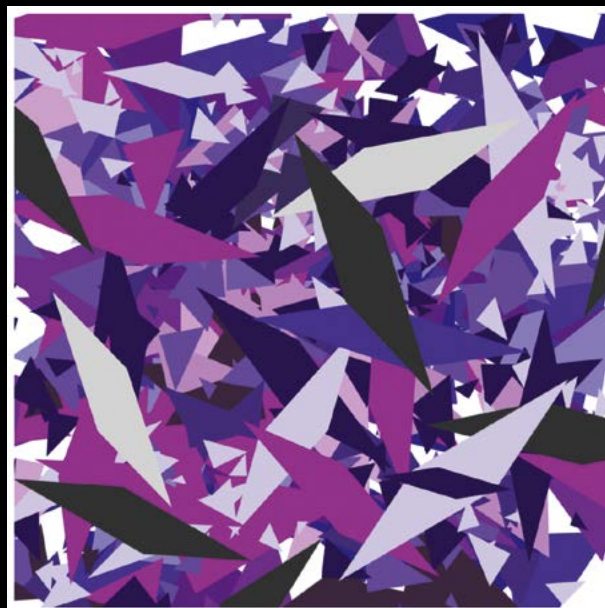

marking.gira.com

The focus of all of our efforts? You.

Innovator. System finder. Future shaper. Gira develops products that lead the way in technology and design. We make rooms think; we give technology a heartbeat; we take responsibility for the future and shape it. Our benchmark for this? The individual requirements of our customers. That means you.

Design Configurator

Using the Gira Design Configurator, you can combine all Gira design lines with functions of your choice. The personally configured product can then be viewed and saved live within your own four walls. Give it a try at: designconfigurator.gira.com

Being innovative means thinking beyond your own four walls.

Gira is a family-run company, and has been for four generations. It's what keeps us at the forefront of residential technology, revolutionising the market with innovative products and system solutions.

"Made by Diversity"

Gira has been producing products at its location in Radevormwald for more than 100 years. The company is fully committed to the "Made in Germany" quality standard. This is what 1,250 employees from 27 nations work for – each and every one of them with different talents, individual expertise, wide-ranging experiences and different life stories. This diversity – supported by common values – is the basis for our creativity, innovative strength and viability for the future.

Innovative technology meets excellent design

Gira has always aspired to combine maximum functionality and reliability in a unique design. With a host of international design awards to their name, our stylish product lines set new standards in development and innovation.
